material: 3-layer polyethylene

**Biodegradable version:**  
length: 40 m  
compliance: EN13432

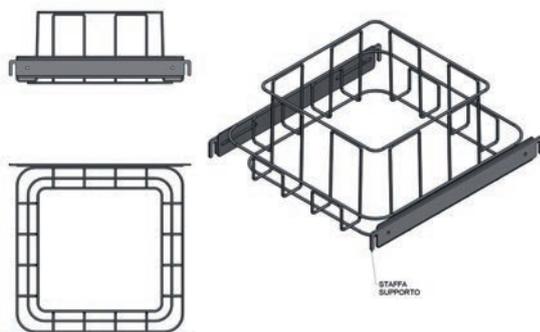

colors:

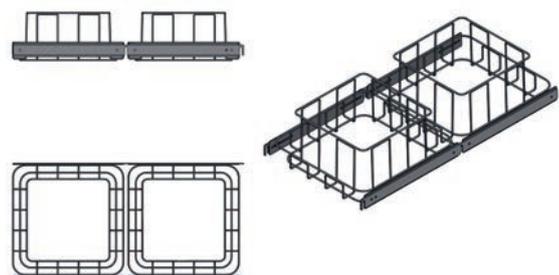

## Baskets for Mini charging housing

### Single basket

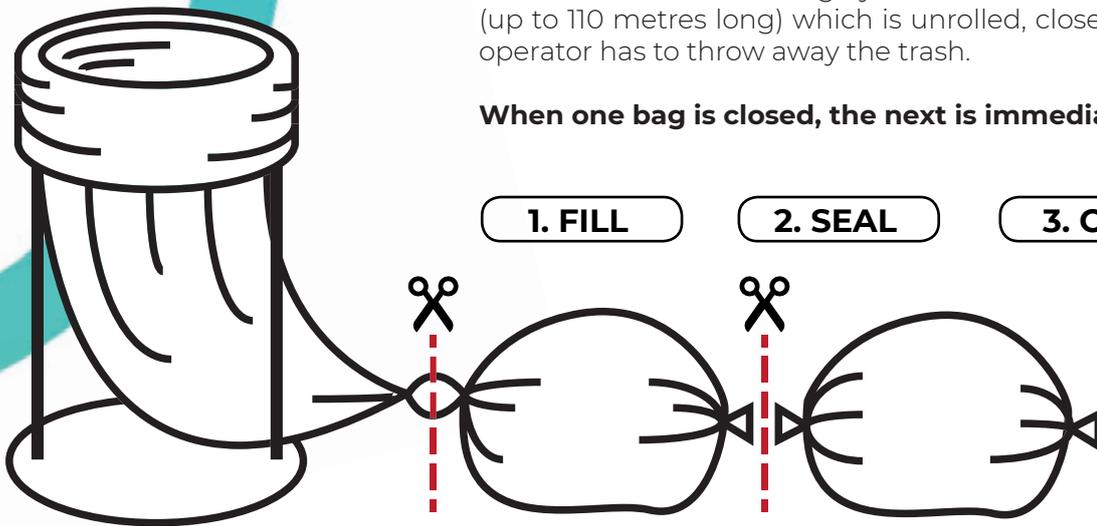

### Double basket

## CONTINUOUS BAG SYSTEM - HOW IT WORKS?

The Saclo continuous bag system is based on a special “endless” bag (up to 110 metres long) which is unrolled, closed and cut every time the operator has to throw away the trash.

**When one bag is closed, the next is immediately ready to use!**

BAG  
REPLACEMENT

25 sec.

Housings for **continuous bag** refill compatible with cleaning trolleys.

## Saclo Baskets for Cleaning Trolleys

Saclo baskets compatible with Cleaning Trolleys have been designed to be able to equip traditional trolleys with the **innovative continuous bag system**.

A simple anchoring bracket allows you to hook the Saclo basket to the trolleys structure.

We have thought of **two versions: single basket and double basket** in which it is possible to use two bags with the same color or two different colors where it is necessary to differentiate the waste collection.

The use of Cleaning Trolleys equipped with a continuous bag system offers **numerous advantages**: plastic waste is reduced by up to 70% compared to the use of traditional bags; the convenience and speed of the bag change make the operator's work more practical with a **considerable saving of time**; it is hygienic you do not come into contact with waste.
