LARGE

Equivalent to **5 traditional bags**

AREA OF USE

Public spaces

Supermarkets

Shopping malls

Scissors included with all models

Saclo° Outdoor

base: 53 × 53 cm

height with round cover: 115 cm

height with square cover: 126 cm

frame material: powder-coated steel (Grey RAL 7016)

door panel material: printed and cut Dibond

Available colours:

Maxi refill

length: 110 m

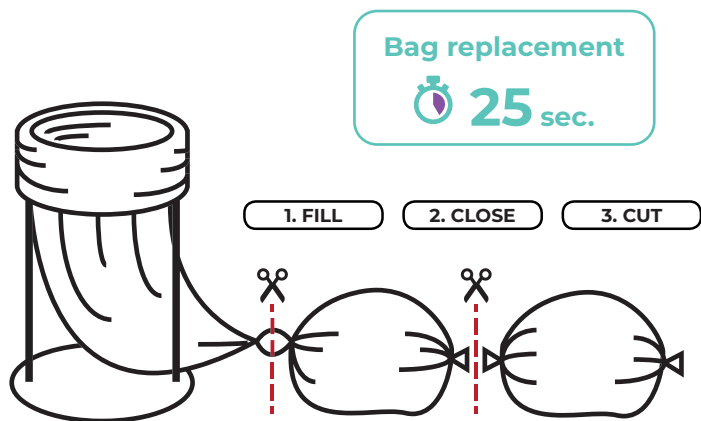

diameter: 570 mm

material: 3-layer polyethylene

colors:

CONTINUOUS BAG SYSTEM

How it works?

The Saclo **continuous bag system** is based on a special “endless” bag (up to 160 metres long) which is unrolled, closed and cut every time the operator has to throw away the trash.

When one bag is closed, the next is immediately ready to use!

Saclò Outdoor

Made of steel and coated with special protective paints, the **Outdoor bin** combines durability with **high capacity**, making it ideal for high-traffic areas, both indoors and outdoors.

The continuous bag system uses a **110-meter refill made of 3-layer polyethylene**.

This allows the operator to seal the waste and remove only the portion of the bag that has been used, **avoiding waste** and ensuring that the next section is always ready.

The result? Faster bag changes, zero contact with waste, and reduced plastic consumption. **A clear advantage in terms of hygiene, efficiency, and sustainability.**
