width: 45 cm
depth: 28 cm
height: 68 cm
material: ABS plastic

Refill

length: small 24 m, large 30 m
material: single-layer polyethylene
100% biodegradable

CONTINUOUS BAG SYSTEM - HOW IT WORKS?

The Saclò continuous bag system is based on a special “endless” bag (up to 110 metres long) which is unrolled, closed and cut every time the operator has to throw away the trash.

When one bag is closed, the next is immediately ready to use!

BAG
REPLACEMENT

25 sec.

Waste basket with the **continuous bag system**.

Saclò SANIDROP

Description

Designed for professional public environments, Sanidrop has a **foot-pedal opening** that makes it extremely **easy to use and hygienic**.

Available in Large (64 litre) and Small (37 litre) versions, Sanidrop is perfect for a **wide range of needs**: medical clinics and nurseries, beauty centres, public toilets and changing rooms, veterinary clinics, sports centres and much more.

It is extremely **eco-friendly** due to the materials used in the ABS plastic basket: in fact, its continuous bag is made of polyethylene combined with ECM, a special additive that is **completely biodegradable in the natural environment**.

The integrated continuous bag system makes Sanidrop much better than many other baskets: **no contact with waste, bag change in less than 30 seconds and minimum waste of plastic**.
