height: 68 cm

material: ABS plastic

Refills

length: 30 m

material: single-layer

polyethylene 100%

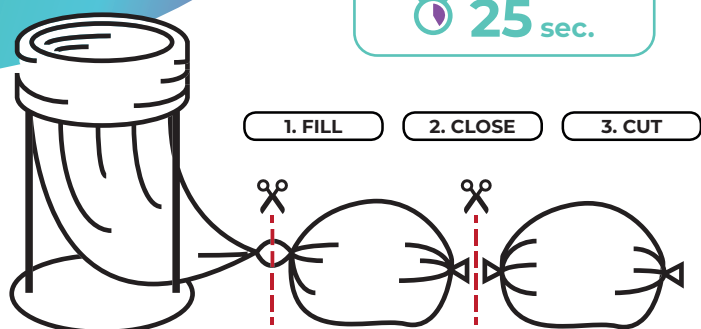

biodegradable

Scissors included with all models

Bag replacement

 **25** sec.

CONTINUOUS BAG SYSTEM

How it works?

The Saclò **continuous bag system** is based on a special “endless” bag (up to 160 metres long) which is unrolled, closed and cut every time the operator has to throw away the trash.

When one bag is closed, the next is immediately ready to use!

Saclò SANIDROP

Designed for professional environments dedicated to personal care and hygiene, Sanidrop features a **pedal-operated opening** that ensures maximum ease of use while helping to **maintain hand hygiene**.

With its 64-litre capacity, Sanidrop is ideal for a **wide range of applications**, including clinics and care homes, beauty centres, public restrooms and changing rooms, veterinary clinics, sports centres and much more.

Environmental responsibility is a key focus, starting with the materials used for this ABS plastic bin. Its continuous bag is made from polyethylene combined with ECM, a special additive that ensures **complete biodegradability in organic environments**.

The integrated continuous bag system makes Sanidrop a superior alternative to many other waste bins: **no contact with waste, bag replacement in less than 30 seconds and minimal plastic waste**.
