material: AISI 304 stainless steel or painted steel

Pedal Maxi

base: 58x66 cm

height: 107 cm

weight: 16 Kg

material: AISI 304 stainless steel or painted steel

Mini refill

length: 60 m

diameter: 357 mm

material: 3-layer polyethylene

Maxi refill

length: 110 m

diameter: 570 mm

material: 3-layer polyethylene

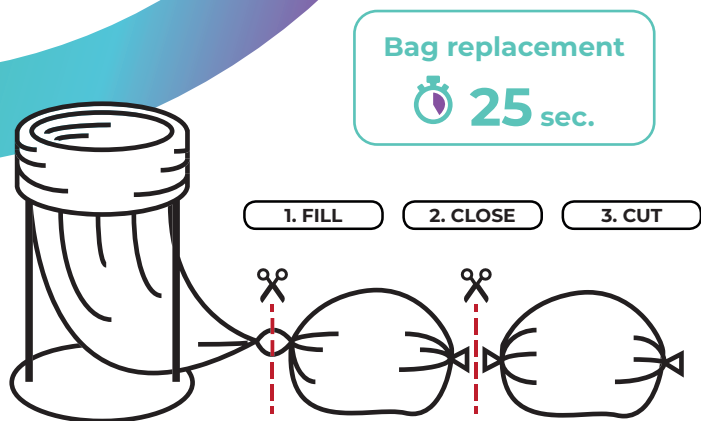

Scissors included with all models

colors:

CONTINUOUS BAG SYSTEM

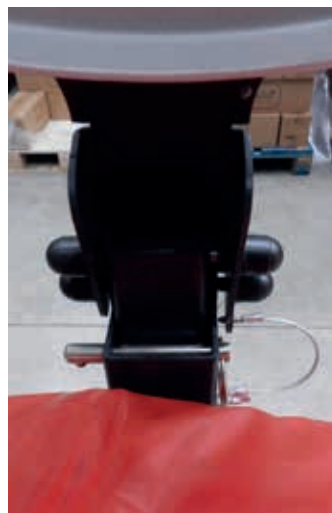

How it works?

The Saclò **continuous bag system** is based on a special “endless” bag (up to 160 metres long) which is unrolled, closed and cut every time the operator has to throw away the trash.

When one bag is closed, the next is immediately ready to use!

Suitable for a **wide range of working environments**, Saclò Pedal features a **pedal-operated lid** for **practical and hygienic use**. Hands remain free and do not come into contact with the lid, which also helps contain unpleasant odours. A **convenient locking system** keeps the lid open while replacing the refill, making the process quicker and easier. The reinforced housing, strengthened by a surrounding band, ensures **sturdiness, durability and reliability** even under frequent use.

Thanks to its **wheeled base** and the **SACLÒ continuous bag system**, Saclò Pedal optimises waste collection and handling, reducing space requirements, operating time and management costs. Saclò Pedal is available in **Mini and Maxi** sizes, in either **powder-coated steel or stainless steel**. Refills are available in **six colours**, as well as in a **biodegradable version**, helping to facilitate waste sorting and separate collection.
